Continued Prosecution Application

The request filed on 8/14/2001 (Paper #35) for a Continued Prosecution Application
 (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/064,057 is acceptable and a
 CPA has been established. An action on the CPA follows.

claims 26, 28, 33-34, 37, 39-40 and 117-135 are pending in the application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Application/Control Number: 09/064,057 Page 3

Art Unit: 1652

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 26, 28, 33-34, 37, 39-40 and 117-135 remain rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 190-191 of U.S. Patent No. 6,603,608 (5/16/2000). As mentioned previously although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of claims 190-191 directed to a method of producing a reverse transcriptase having DNA polymerase activity and reduced RNAse H activity in U.S. Patent 6,603, 608 embraces the scope of instant claims. In response to this rejection applicant requested to hold this rejection in abeyance until identification of patentable subject matter in the present application, at which time applicants will consider filing a terminal disclaimer.

As indicated in the advisory action (paper # 31) the only issue remaining with regards to patentability of pending claims is the double patenting rejection indicated above. On 10/9/2001 the examiner called Mr. R. Esmond to arrange for a personal interview but her phone call was not returned by Mr. Esmond.

Finally, in view of absence a properly filed terminal disclaimer to overcome the above mentioned rejection claims 26, 28, 33-34, 37, 39-40 and 117-135 continue to be rejected.

No claims are allowed.

Conclusion

3. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
